

Dear Valued Customer

**Price Notification and MOQ Changes effective
November 1, 2011 and January 1, 2012 for TE Connectivity Product Line**

The cost of primary materials, such as copper, steel, gold, silver and petrochemical products such as plastics, as well as freight surcharges, continue to rise and are applying negative cost pressures on TE Connectivity's (TE) products. Gold has increased by a third this calendar year and Silver has increased by 26% since May 2011. The continuous upward trend of materials costs and the increasing pressures on labor, transportation and other costs, requires TE to adjust pricing as well as MOQ's of selected products.

Egli, Fischer & Co. Ltd., Zurich (EF) supports a transparent cost and MOQ structure which is based on the TE pricing catalog. TE will be introducing the new pricing catalog for Aerospace/ Defense/ Marine, Consumer and Industrial Solutions, Relays and Consumer Solutions on November 1, 2011 and a new pricing catalog for GATD, Enterprise, Automotive, Medical and Circuit Protection on January 1, 2012.

EF will, therefore, also be introducing a new pricing at the same time as TE. In order to reduce the consequences of these adjustments, EF is seeking a close cooperation with your company. If you wish to benefit from the current prices, we ask you to place your orders before the date of Oct 24, 2011. This will enable EF to purchase parts not in stock for your requests to ensure we can fulfill your future scheduled deliveries with the current pricing.

We apologize for any inconvenience this may cause and look forward to further developing our relationship and support to your company.

Please contact us or your local Customer Service Representative if you have any questions and to discuss any scheduling requirements on the TE Connectivity Product line.

We hope you are finding the EF model with the added flexibility it offers in pricing, availability, consolidation and custom packaging as an asset to growing and further developing your strengths and sales with the TE Connectivity product line.

Yours sincerely,

Stefan Meier
